Pune, India | +91-9370164075 | yashpandhare2309@gmail.com | linkedin.com/in/yashpandhare | github.com/yashpandhare | Portfolio

## Summary

Backend Software Engineer with 3+ years building AWS-native, AI-powered systems in Java (Spring Boot) and Python. Ships GenAI features (RAG, text-to-SQL, prompt engineering, AWS Bedrock), leads security remediation (FedRAMP, Veracode, BlackDuck), and runs production observability (OpenTelemetry, Grafana, Kubernetes). 570+ merged pull requests across 60+ repositories.

## Technical Skills

**Languages:** Java, Python, TypeScript, SQL
**Backend:** Spring Boot, REST APIs, Microservices, Hibernate, Multithreading, System Design, Maven, Debugging
**GenAI:** RAG, LLM Integration, Prompt Engineering, Text-to-SQL, Agentic AI, AI Agents, AWS Bedrock, Claude Code
**Cloud & IaC:** AWS (Lambda, DynamoDB, IAM, CloudWatch, Bedrock), CloudFormation, CDK, Docker, Git, CI/CD
**Observability & Platform:** OpenTelemetry (OTLP), OpenAPM, Grafana, Mimir, Kubernetes, Helm, Argo CD, Gremlin
**Databases:** Snowflake, DynamoDB, Redis, OpenSearch
**Security & Testing:** Veracode, BlackDuck, Sonar, FedRAMP, JUnit, Mockito, Cucumber, Gatling

## Work Experience

**NiCE Interactive Solutions India Pvt. Ltd.** | *Software Engineer* March 2026 – Present
*Pune, Maharashtra*

- Architected a **RAG solution** over stored conversational history for a GenAI text-to-SQL service, **eliminating 3+ redundant LLM invocations** per request.
- Led cross-team **FedRAMP Moderate (NIST SP 800-53)** remediation for the **Cognigy** platform across **10+ microservices** and **4+ engineering teams**, triaging **40+ HIGH/CRITICAL findings** from root cause through merged, reviewer-approved fixes (SSRF guards, Kafka/TLS enforcement, credential redaction, audit logging).
- Core contributor to a **Python AWS Lambda** conversational API and its LLM prompt templates (**170+ merged PRs**): **cut token consumption 20-30%**, added multilingual support, onboarded new Claude models, and fixed production SSL failures under load.
- Migrated logs and metrics from CloudWatch to **OpenAPM (OpenTelemetry/Grafana)** with the SRE team; built Helm-packaged **Grafana Mimir alerting (87 rules)** with Microsoft Teams routing, deployed to **Kubernetes via Argo CD**.
- Productionized a **GDPR data-erasure Lambda** (Python, boto3) with cross-account IAM roles, **100% unit-test coverage**, Sonar/Veracode scans, and CloudWatch alarms; passed SRE/NOC operational-readiness review.
- Integrated **Gremlin chaos testing** via the Gremlin Lambda extension, instrumenting OpenSearch (RAG) and 4 downstream service calls for fault injection in the performance environment.
- Built and shared **AI agents and Claude Code skills** across teams, automating design documentation and other repetitive engineering tasks.

**NiCE Interactive Solutions India Pvt. Ltd.** | *Associate Software Engineer* July 2023 – March 2026
*Pune, Maharashtra*

- Built and delivered **RESTful APIs in Java Spring Boot** integrating multiple downstream services; partnered with frontend teams to ship features end to end.
- Diagnosed multithreading write conflicts between **Redis and DynamoDB**, **cutting load-test failure rate from 30% to 0%** and eliminating related production incidents.
- Appointed **Security Champion**: led application security reviews with **Veracode and BlackDuck**, mitigating **20+ vulnerabilities** and taking high/medium findings **from 30+ to zero**.
- Integrated **Snowflake** with a Spring Boot microservice using prepared statements, **HikariCP** pooling, key-pair authentication, and connection-failure retries, improving query throughput.
- Built and debugged **Python AWS Lambda** solutions on **Bedrock and DynamoDB**; authored **CloudFormation** alarm and dashboard stacks and owned zero-downtime production deployments.

**NiCE Interactive Solutions India Pvt. Ltd.** | *Software Development Intern* Feb 2023 – July 2023
*Pune, Maharashtra*

- Built a **Spring Boot** reference application for inter-microservice communication and ran **Gatling** load tests on production-equivalent environments to inform release decisions.

## Projects

**AI Production Monitoring and Reporting Tool** | *Python, AWS Bedrock, CloudWatch* Sept 2025

- Built an AI-agent tool that generates daily health and root-cause reports for **9 production environments** at **$0.07/month**, saving **2-3 hours of manual monitoring daily**. **Won the company Sparkathon.**

## Education

**Walchand College of Engineering (Shivaji University)**, Sangli, Maharashtra Aug 2019 – June 2023
*B.Tech in Computer Science and Engineering | GPA: 7.86/10.0*
